

# RICKY LONG

Staff Software Engineer | Fullstack React & Laravel | TypeScript

West Monroe, LA | 318-237-1540 | rickydlong@proton.me | linkedin.com/in/rickydlong

---

## PROFESSIONAL SUMMARY

Fullstack Software Engineer with 9+ years building production web applications with React, TypeScript, and modern JavaScript frameworks. Most recently delivered features on Pizza Hut's enterprise platform using React, TypeScript, Redux, and GraphQL within a cross-functional agile team. Experienced in full-stack development with REST APIs, Node.js, and relational databases. Seeking a staff-level fullstack role in a creative agency environment.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, Python, PHP

**Frameworks & Libraries:** React, Redux, Next.js, Angular, Node.js, Laravel, WordPress

**APIs & Data:** GraphQL, RESTful APIs, JSON, MySQL, PostgreSQL

**Testing & Quality:** Unit Testing, Jest, ESLint, TypeScript Compiler (tsc)

**Tools & Platforms:** Git, GitLab, GitLab CI/CD, Jira, VS Code, npm, Docker

**Methodologies:** Agile/Scrum, Code Review, Performance Optimization, Cross-Functional Collaboration

## PROFESSIONAL EXPERIENCE

### Software Engineer

**Dexian (Contract — Pizza Hut)** | Remote

January 2025 – March 2026

- Develop and maintain features for Pizza Hut's enterprise call center application using React, TypeScript, and Redux, enabling order processing and store fulfillment across nationwide locations
- Collaborate within a 10–15 person cross-functional agile scrum team to deliver sprint commitments, participate in design discussions, and refine technical requirements with product owners
- Debug, troubleshoot, and resolve front-end defects with unit testing, linting, and type checking, optimizing application performance and reliability
- Integrate with backend services via GraphQL APIs to ensure seamless data flow between the front-end interface and order management systems
- Conduct code reviews in GitLab for peer-submitted merge requests, enforcing code quality standards and leveraging CI/CD pipelines to reduce technical debt
- Maintain technical documentation and ensure smooth integration between front-end components and cross-functional services

### Data Analyst

**Telephone Electronics Corporation** | Monroe, LA

November 2024 – January 2025

- Queried and extracted data from relational databases using SQL to fulfill reporting requests from internal stakeholders
- Transformed and analyzed datasets to produce summary reports, identify trends, and support data-driven decision-making

### Software Development Instructor

**Unitech Training Academy** | Lafayette, LA

November 2023 – March 2024

- Developed and delivered software development curriculum covering programming fundamentals and hands-on coding practices
- Improved student pass rates by 15% through implementation of project-based learning and individualized feedback
- Translated complex technical concepts into accessible lessons for students at varying skill levels

### Front-End Web Developer

**Acadiana Marketing Solutions** | Broussard, LA

May 2017 – August 2024

- Built and customized front-end code and WordPress websites for 10+ clients across diverse industries, delivering responsive, user-friendly designs
- Managed full project lifecycle from requirements gathering through deployment, iterating on existing sites with feature updates and performance improvements

## EDUCATION

### **Bachelor of Science, Computer Science**

University of Louisiana Monroe | Monroe, LA
