

RICKY LONG

Fullstack Developer | Python & React | TypeScript

West Monroe, LA | 318-237-1540 | rickydlong@proton.me | linkedin.com/in/rickydlong

PROFESSIONAL SUMMARY

Fullstack Developer with 9+ years building production web applications with React, TypeScript, and Python. Currently delivering features on Pizza Hut's enterprise platform using React, TypeScript, Redux, and GraphQL. Experienced with Python scripting, data analysis, REST APIs, and full-stack JavaScript development. Seeking fullstack roles leveraging Python and React.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, CSS3, SQL

Frameworks & Libraries: React, Redux, Next.js, Node.js, Angular, Flask, Django, WordPress

APIs & Data: GraphQL, RESTful APIs, JSON, PostgreSQL, MySQL

Testing & Quality: Unit Testing, Jest, ESLint, pytest, TypeScript Compiler (tsc)

Tools & Platforms: Git, GitLab, GitLab CI/CD, Jira, VS Code, npm, Tableau

Methodologies: Agile/Scrum, Code Review, Data Analysis, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Engineer

Dexian (Contract — Pizza Hut) | Remote

January 2025 – March 2026

- Develop and maintain features for Pizza Hut's enterprise call center application using React, TypeScript, and Redux, enabling order processing and store fulfillment across nationwide locations
- Collaborate within a 10–15 person cross-functional agile scrum team to deliver sprint commitments, participate in design discussions, and refine technical requirements with product owners
- Debug, troubleshoot, and resolve front-end defects with unit testing, linting, and type checking, optimizing application performance and reliability
- Integrate with backend services via GraphQL APIs to ensure seamless data flow between the front-end interface and order management systems
- Conduct code reviews in GitLab for peer-submitted merge requests, enforcing code quality standards and leveraging CI/CD pipelines to reduce technical debt
- Maintain technical documentation and ensure smooth integration between front-end components and cross-functional services

Data Analyst

Telephone Electronics Corporation | Monroe, LA

November 2024 – January 2025

- Queried and extracted data from relational databases using SQL to fulfill reporting requests from internal stakeholders
- Transformed and analyzed datasets to produce summary reports, identify trends, and support data-driven decision-making

Software Development Instructor

Unitech Training Academy | Lafayette, LA

November 2023 – March 2024

- Developed and delivered software development curriculum covering programming fundamentals and hands-on coding practices
- Improved student pass rates by 15% through implementation of project-based learning and individualized feedback
- Translated complex technical concepts into accessible lessons for students at varying skill levels

Front-End Web Developer

Acadiana Marketing Solutions | Broussard, LA

May 2017 – August 2024

- Built and customized front-end code and WordPress websites for 10+ clients across diverse industries, delivering responsive, user-friendly designs
- Managed full project lifecycle from requirements gathering through deployment, iterating on existing sites with feature updates and performance improvements

EDUCATION

Bachelor of Science, Computer Science

University of Louisiana Monroe | Monroe, LA
